### DETERMINATION OF NONSIGNIFICANCE (DNS)

**Name of Proposal:** TIGER TROUT PLANT IN FOREST LAKE

**Description of Proposal:** Plant Tiger Trout in Forest Lake to control goldfish.

WDFW will conduct a biological assessment of Forest Lake to determine existing fish presence and abundance prior to stocking tiger trout. Following this initial assessment the lake will be stocked at a rate of 50-200 tiger trout per surface acre. Agency staff will conduct annual post tiger trout stocking assessments beginning in fall of 2014 to determine how existing fish populations respond to the stocking event. Subsequent stocking will be determined based on tiger trout survival, growth, and potential as a biological solution to illegally stocked goldfish.
